SCOAP³ journals are open for any scientist to publish in without any financial barriers. Copyright stays with authors and a permissive CC-BY license allow text- and data-mining. SCOAP³ addresses Open Access mandates at no burden for authors. All articles appear in the SCOAP³ repository at <http://repo.scoap3.org> for further distribution, as well as being available as Open Access on publishers' websites.

SCOAP³ has converted key High-Energy Physics journals to Open Access at no cost for authors. SCOAP³ centrally pays the publishers which in turn eliminate or reduce subscription fees for these journals to all their customers. These funds are

pooled in a SCOAP³ common fund: each country participates at a level commensurate with its scientific output.

CERN acts as the host institution for the SCOAP³ collaboration of thousands of libraries, funding agencies and research institutions. SCOAP³ has active community-wide governance. A Governing Council, consisting of representatives of the participating countries, defines the strategy of the partnership. An Executive Committee oversees day-to-day operation provided by CERN. Community Working Groups advise the repository development and services and the partnership outreach.

Memorandum of Understanding signed
Other countries with at least one SCOAP³ author

PUBLISHER	JOURNAL
Elsevier	Nuclear Physics B
Elsevier	Physics Letters B
Hindawi	Advances in High Energy Physics
IOPp / Chinese Academy of Sciences	Chinese Physics C
IOPp / German Physical Society	New Journal of Physics
IOPp / SISSA	Journal of Cosmology & Astroparticle Physics
Jagiellonian University	Acta Physica Polonica B
Oxford University Press / Physical Society of Japan	Progress of Theoretical & Experimental Physics
Springer / Italian Physical Society	European Physical Journal C
Springer / SISSA	Journal of High Energy Physics
